2019 EVENT HEALTH & SAFETY PLAN TEMPLATE

1. The completion of an Event Health & Safety Plan is a requirement of **ALL** School Sport NZ sanctioned events agreed to by event organisers in their sanctioning application. ***Event Health & Safety Plans must be submitted 6 weeks prior to the event date to the School Sport NZ Administrator, office@schoolsportnz.org.nz***. These will be posted on the School Sport NZ website for principals who will then determine if they send students to an event.

Where an Event Health & Safety Plan has still not been received 2 weeks prior to an event, School Sport NZ will withdraw the sanction form the event and advise schools not to attend.

2. The preparation and submission of the Event Health & Safety Plan is the responsibility of the Event Organiser and must include;
 - a. Event Safety Plan – details of risk management associated with the specific event
 - b. Sport Specific Safety Plan – details of risks inherent in the specific sport. The NSO responsible for your sport should be able to supply you with this.
 - c. Venue Safety Plan – including emergency evacuation procedures. The management of the venue you are using should be able to supply you with this.
3. This template may assist you in identifying risks and developing appropriate actions to mitigate these when developing an Event Health & Safety Plan. However if you have a plan in an alternative format you are welcome to submit that providing it covers the required material in 2 above.
4. This document should be completed with reference to;
 - *Health and Safety Guidance for School Sport – Ministry of Education 2016*
 - *School Sport NZ Event Health & Safety System*

SECTION 3: Risk Assessments and Management

You can use the guide below to assess risk levels in completing your Event Risk Assessment. The template on the following page will guide you.

Likelihood	Consequence				
	Insignificant	Minor	Moderate	Major	Critical
Almost Certain	Medium	Medium	High	Extreme	Extreme
Likely	Low	Medium	High	High	Extreme
Possible	Low	Medium	High	High	High
Unlikely	Low	Low	Medium	Medium	High
Rare	Low	Low	Low	Low	Medium

Consequence	Description of Consequence	Likelihood	Description of Likelihood
1. Insignificant	No treatment required	1. Rare	Will only occur in exceptional circumstances
2. Minor	Minor injury requiring First Aid treatment (e.g. minor cuts, bruises, bumps)	2. Unlikely	Not likely to occur within the foreseeable future, or within the project lifecycle
3. Moderate	Injury requiring medical treatment or lost time	3. Possible	May occur within the foreseeable future, or within the project lifecycle
4. Major	Serious injury (injuries) requiring specialist medical treatment or hospitalisation	4. Likely	Likely to occur within the foreseeable future, or within the project lifecycle
5. Critical	Loss of life, permanent disability or multiple serious injuries	5. Almost Certain	Almost certain to occur within the foreseeable future or within the project lifecycle

Assessed Risk Level	Description of Risk Level	Actions
<input type="checkbox"/> Low	If an incident were to occur, there would be little likelihood that an injury would result.	Undertake the activity with the existing controls in place.
<input type="checkbox"/> Medium	If an incident were to occur, there would be some chance that an injury requiring First Aid would result.	Additional controls may be needed.
<input type="checkbox"/> High	If an incident were to occur, it would be likely that an injury requiring medical treatment would result.	Controls will need to be in place before the activity is undertaken.
<input type="checkbox"/> Extreme	If an incident were to occur, it would be likely that a permanent, debilitating injury or death would result.	Consider alternatives to doing the activity. Significant control measures will need to be implemented to ensure safety.

Control the Risk: Use the template on the following page;

1. List the hazards/risks you have identified.
2. Rate their risk level (refer to information above to assist with this).
3. Detail the appropriate control measures you will implement to control the risk.

Note: Control measures should be implemented in accordance with the preferred **hierarchy of control**.

Hierarchy of Controls -	
Most effective (High level)  Least effective (Low level)	Elimination: remove the hazard completely from the workplace or activity
	Substitution: replace a hazard with a less dangerous one (e.g. a less hazardous chemical)
	Engineering control: making an event safer separate people from the hazard (e.g. safety barrier)
	Administration: putting rules, signage or training in place to make the event safer (e.g. induction, route plan, safety training)
	Personal Protective Equipment (PPE): Protective clothing and equipment (e.g. helmets, mouth guards, PFD's)
